DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 (in part), 2-3, 5-13, drawn to an isolated gene regulating fruit and seed development having a nucleotide sequence set forth in SEQ ID NO:1 or variants thereof; expression vector, transgenic plant, method and composition comprising said gene.

Group II, claim(s) 1 (in part), 2, 4-13, drawn to an isolated gene regulating fruit and seed development having a nucleotide sequence set forth in SEQ ID NO:2 or variants thereof; expression vector, transgenic plant, method and composition comprising said gene.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the isolated gene having a nucleotide sequence set forth in SEQ ID NO:1 is taught in the prior art. Vosman et al (2001, NCBI Accession Number AJ251117, GI:16973295) teach Applicants' nucleic acid sequence of SEQ ID NO:1.

Art Unit: 1638

3. In addition, the claims are not linked by a single technical feature because they are each drawn to products and processes not shared by the other. The nucleic acid sequence of SEQ ID NO:1 is not linked or shared by the nucleic acid sequence of SEQ ID NO:2 of Group 2.

4. Applicants' chemical compounds, i.e., different DNA sequences encoding different polypeptides, each have different properties and different core structures that elicit different activities; and as such, the Groups I-II are not linked by, or share, a single special technical feature.

5. Each of Inventions I-II are capable of being separately made, independently used and the patentability of one does not render the others obvious or unpatentable.

6. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by the literature and sequence searches required for each of the Inventions are not required for another of the Inventions, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1638

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stuart F. Baum whose telephone number is 571-272-0792. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg can be reached on 571-272-0975. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
